---

## About Me

✳️ Passionate Full Stack Web Developer with a knack for creating dynamic, user-centric applications. Skilled in the MERN stack and committed to continuous learning and professional growth. I thrive in collaborative environments and embrace Agile methodologies to deliver high-quality solutions.

---

## Technical Skills

- Programming Languages: JavaScript, Node.js, Python
  - Web Technologies: React, Express, HTML5, CSS3, DOM
  - Database Management: MongoDB
  - Version Control: Git, GitHub
  - Frameworks & Tools: Tailwind CSS, Bootstrap, Vite, RESTful APIs
- 

## Professional Experience

CODE For India – Hyderabad, India

Fellow | June 2024 - Present

- Gaining hands-on experience in MERN Stack development.
  - Engaged in full-stack development with a focus on the MERN stack, enhancing coding skills through practical projects.
  - Developed several applications, including:
    - Alarm Clock: Intuitive interface for setting alarms.
    - GitHub User Search App: Efficiently search and display GitHub user profiles.
    - Podcast Manager: Currently building a platform to manage and organize podcast episodes.
  - Actively involved in Agile practices, fostering teamwork and rapid iteration.
- 

## Education

Lords Institute of Engineering & Technology – Hyderabad, India

Bachelor of Engineering | 2020 - 2024

## Projects

1. **Alarm Clock:** Developed an intuitive interface for setting alarms and reminders.
  2. **Stopwatch:** Created a user-friendly stopwatch application for tracking elapsed time.
  3. **Timer:** Implemented a countdown timer tool with customizable settings.
  4. **GitHub User Search App:** Built an application to search and display GitHub user profiles with real-time data.
  5. **Spreadsheet App:** Developed an interactive spreadsheet for data management and calculations.
  6. **Dynamic Table Creator:** Designed a tool to create and manage dynamic tables for various applications.
  7. **Font Converter:** Created a simple application for converting fonts between different formats.
  8. **Virtual/Digital Keyboard:** Developed a web-based keyboard enhancing accessibility for users.
  9. **Mind-game App:** Engaged users with a fun interactive game that challenges logic and creativity.
  10. **Weather App:** Created a responsive application providing real-time weather updates using third-party APIs.
  11. **To-do App:** Developed a feature-rich task management application with CRUD functionalities.
  12. **Podcast Manager:** Currently developing a platform to manage and organize podcast episodes.
- 

## Interests

- Web Development
  - UI/UX Design
  - Open Source Contribution
  - Continuous Learning in Technology
